

# **MEDICATION ASSISTED TREATMENT (MAT)**

## **POLICY AND PROCEDURE**

*MAT as defined by SAMHSA includes opioid treatment programs (OTP) and combines behavioral therapy and medications to treat substance use disorders.*

- Individuals coming into McShin that are currently on MAT must follow McShin's medication monitoring policy and are subject to all additional rules and regulations. If individuals abuse MAT and/or are showing effects of being overly medicated, as a direct result of their MAT, they will be required to have a consult with the addiction specialist, Dr. Peter Breslin, and are subject to be exited from McShin.
- Individuals who are currently at McShin and request MAT must go through addiction specialist, Dr. Peter Breslin, for an initial consult. If there is a financial barrier and/or the individual has private insurance and would like to see an outside specialist those cases will be reviewed individually.
