

McShin Data Snapshot

McShin research and data collection efforts surveyed multiple domains this year. Of the 522 participants that came through McShin housing between January 2018 and December 2019, 282 responded to our survey efforts. The Data for The McShin Foundation is collected through self-reported results by our participants.

Criminal Justice

90%

Percentage of participants who had previous arrest upon entry

93%

Percentage of Alumni that have not been arrested since leaving McShin

7%

Percentage of Alumni that have been arrested since coming through The McShin Foundation

Recovery

McShin
Recovery Resource
Foundation

Percentage of alumni not engaged in recovery

Percentage of alumni that are engaged in recovery. [Recovery is defined as being engaged in one of the multiple pathways of recovery: 12-Step Program, Faith-Based, MAT, Abstinence, etc...]

Employment

70%

Percentage of alumni that are currently employed

18%

Percentage of alumni currently unemployed

Success rate is calculated by combining and averaging the positive outcome values of; Recovery Engagement, Employment, and Contact with the Criminal Justice System. In doing this, results show McShin alumni have a 78.3% success rate. Data reflects number of respondents. 24% of alumni did not respond to our survey.

We utilize the same measure of success as defined by The Journal of Substance Abuse Treatment and The Public Health Institute (2019).
